Mac Mini of MobileLab must be collected at the Library (floor -1).

Once in the lab, you can connect and turn on the Mac, and log in with the user **creautenti** with an empty password. Using this account,

- Create a new account with your name and surname. You can create an Admin account to be able to install what you need.

With your personal **account**:
1. connect the mac mini to the wireless network using your student account;
2. if you want to use Flutter, the folder where it is installed is /Applications/flutter. The subfolder /Applications/flutter/bin must be added to the path;
3. If you use Corona, it will ask for an account and password. These are the ones you already created if you already downloaded the framework, otherwise create a new account on the Cordova website.

To develop native iOS applications
The two Mac Mini run operating system and Xcode updated on 24th May 2022.

To request a developer account for iOS, please send an email to me with your request.

The two iPhone XR available at the Library are already linked to the developer account of the university.

For any kind of problem do not hesitate to contact me.
