# Positive design: Gestures

NewPipe

A libre lightweight streaming front-end for Android.

Available gestures:

- **Swipe**
- **Long pressure**
- **Phone rotation**

- **Natural and intuitive**
- **Easy to learn**
- **Customizable from the settings**

Negative design: KISS

Main cons:

- **Cluttered UI**
- **Counterintuitive**

Some solutions:

- **Minimization of the style**
- **Redesign of spaces and gestures**
